

# What Animal Am I?

## Activity sheet

### Can you guess what animal I am?

I'm an Australian native marsupial that can be found in forests, woodlands and heath of eastern Australia. I have short legs, and a long tail. My body is covered in coarse fur that is red-brown to dark brown, with white spots on my body that extend along my tail. My underside can be grayish or creamy white. I have a pointed snout, a moist pink nose and sharp teeth. I am solitary (which means I spend a lot of time by myself) and I hunt mostly at night eating things like insects, crayfish, lizards, snakes, birds and small mammals. I also will eat eggs and carrion (dead animals) such as kangaroos, pigs and dingoes. What animal am I?

**Draw a picture of what animal you think this week's guest might be below!**
