

# Backyard Bingo

With the Atlas of Living Australia!

## What lives near your place?

Enter your house or school address into the “Explore Your Area” search function on the Atlas of Living Australia website (<https://biocache.ala.org.au/explore/your-area>). It may be a good idea to limit your search to a one km radius, to avoid a very large list! Chose 10-12 animals to write down or draw in the table below. You might like to choose birds, reptiles or mammals, or a mix of animals from different groups. Or even some plants! Cross the living things off as you see them! Can you see them all?
