

What Animal Am I?

Activity sheet

Can you guess what animal I am?

I live in tropical and subtropical waters in the Indo-Pacific Ocean. I use my spines and teeth to burrow myself into rocks, and I venture out from these hollows at night to graze on algae. I also eat sea grasses, coral, sea sponges, and molluscs (molluscs are things like clams, scallops and snails). I can be greenish-grey to reddish-brown in colour, and my body is covered in spines that end in a sharp point. The tips of my spines are often, but not always, white.

Draw a picture of what animal you think this week's guest might be below!
